[Clinical Hypnotherapy – Empowers you to make the Changes you Want](#)

Hypnotherapy is the most effective way to make positive, lasting changes to your life. Old unwanted patterns of behaviour, such as smoking, obesity, addiction and phobias, can be removed and new, desired behaviours implemented, all at an amazing pace. Many health issues such as stress; migraine; insomnia; bruxism- (teeth grinding); diagnosed IBS; skin conditions: eczema; chronic pain and many other issues, can all be treated using hypnotherapy.

Furthermore, Hypnotherapy can also help to enhance many positive issues to improve life, such as increased confidence, and levels of success and happiness, enhance sports ability, confidence for job interviews, driving test, exams etc, reduce stress levels and improve relaxation.

Fertile Body Method is a mind body approach to fertility, whether you are trying to conceive naturally or undergoing medical treatment such as IVF, you could benefit from hypnosis, which is potentially a very powerful and effective therapeutic tool to facilitate inner change, which can positively impact on physical wellbeing and fertility.

Consultation and first session 1.1/2hr - £95

Treatment sessions are typically 1.hr - £70

Smoking Cessation price, please ask for details.
